Data sheet - Page 1

LD Flexi is a robust, very shallow, IP68 rated flexible 24V linear LED product. Ideal for a range of architectural applications such as step details. LD Flexi is not intended for permanent underwater use.

Please note colour shift: Due to the resin being in contact with the LED there is a colour shift of around 600K to a cooler white colour temperature. This means the warmest white we can supply is 3000K which uses 2400K LED tape (Shortpitch only).

#### **Key Features**

- Choice of LED outputs depending on the application, including RGB
- Specially designed PVC extrusion which is robust but very flexible with excellent resistance to chemical attack
- LEDs are encapsulated in an optically clear UV resistant polyurethane resin
- Fixing is by stainless steel fixing clips, with a choice of two depending on the installation detail
- LD Flexi only bends in the vertical plane (around the thinnest side), to a minimum bend radius of 200mm
- Lengths are custom made to suit to a maximum of 3015mm\*\*
- Available with Switched, 1-10V, DMX or Dali drivers

#### Suggested mounting details

We recommend the distances shown below when mounting multiple lengths end to end to ensure a continuous wash of light.

Flat fixing clip

Photometric files are included in the design pack which can be downloaded from the LD Flexi product page on the website.
