

High Power Interior/Exterior LED Uplighter

Data sheet - Page 1

The new LD151 features the all new E1 LED engine, optional glare shields and a new range of optics. Tunable White and RGBW options are also available. A powerful uplighter for its size and depth, the new LD151 has been designed specifically to produce low glare illumination to walls and columns. It can be used for a wide range of project styles with a minimal aesthetic and no visible fixings. This is a very tough, high quality fitting, machined from high grade materials ensuring excellent thermal and light output performance. Ideal for indoor or outdoor applications.

Key Features

- New E1 engine, featuring the CREE XHP35 LED with 2-step binning
 New optional 2nd channel LEDs for secondary lighting applications
- New 700mA option when specified with /484N concrete can, delivering
- New 700mA option when specified with /484N concrete can, delivering up to 555 lumens
- New optics, featuring an impressively narrow 10° spot is for lighting columns and arches, or a 15°x 49° spreader lens, which is ideal for wall washing applications
- Single optic produces a very consistent beam with no multiple shadows
- LED and lens recessed in a matt black anodised body for reduced glare
- Choice of glare shields
- No visible fixings
- Range of bezel finish options
- Built-in reverse polarity protection
- LD151 is available with RGBW and Tunable White LED engines
- Available with Switch, 0-10V, DMX, Dali or Mains dimmable drivers

Specification

Applications

Beam Angles 10°, 19°, 34°, 54°, 15°x 49°

LED type 1 x E1 LED Engine with 2-step binning (LED data below)

Colour temperature 2700K*** / 3000K / 4000K 5000K

Colour temperature	2700K**** / 3000K / 4000K			SUUUK		
Current	350mA	500mA	700mA*	350mA	500mA	700mA*
LED power (Max)	5W	7W	10W	5W	7W	10W
	(4.4W)**	(6.3W)**	(9W)**	(4.4W)**	(6.4W)**	(9W)**
CRI (Min)	85	85	85	80	80	80
Forward voltage (V) ₁₀₀	14V	14V	14V	14V	14V	14V
Delivered lumens (L ₁₀₀)****	347	437	555	374	472	599
Lumens per circuit watt	69	62	55	75	67	59

LED lifetime (to 70% 50,000hrs at a max ambient temperature of 35°C lumen maintenance) (if higher ambient then run at 500mA up to 45°C) Glass 6mm thick low iron glass

Materials Black anodised aluminium body, machine finish 316 stainless

steel bezel (other options available)

Sleeve - Black Acetal

Wiring Comes pre-wired with 250mm lead. Single colour equipped

with 2 core cable, 2 Channel or TW engine with 4 core cable & RGBW with 8 core cable. Can be specified with up to 10m

at extra cost.

IP rating IP67

*can only be specified with /484N concrete housing

**indicates the nominal power for the LED run at that particular current and includes losses associated with using an 85% efficient driver

***2700K lumen output is 8% lower than the 3000K figure listed

****lumen output indicated is without the glare shield. Allow 30% less with the /GS glare shield.

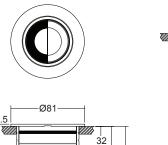

Data sheet - Page 2

Fixing Accessories

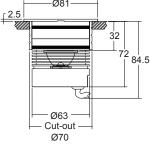

The fitting is supplied as standard with a fixing sleeve; this is bonded into the mounting surface first. The LD151 is secured into the sleeve by 2 'O' rings on the body. When pushed into the sleeve it creates a watertight seal.

/484S First Fix Sleeve supplied as standard

High Power Interior/Exterior LED Uplighter

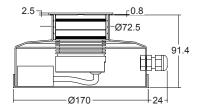

/484N Concrete housing

/ID Optional integral non-dimming driver (single colour only at 350mA or 500mA)

Concrete housing must be used when specifying the 700mA fitting. The aluminium can aids in keeping the LED fitting cool, as it helps with thermal transfer between the heat within the can to the surrounding concrete.

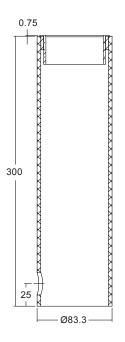

/484GT Ground tube

The in-ground tube has been designed for applications where a recessed uplighter is required in soil or gravel surfaces. The tube can be buried with the necessary wiring, and then the fitting installed after the landscaping work has been completed. It is supplied with the fixing sleeve bonded into the tube, and can be cut down on site.

Data sheet - Page 3

Glare Shields

LD151 now comes with a choice of glare control options.

High Power Interior/Exterior LED Uplighter

/NGS

No glare shield. Deep recessed optic and matt black anodised optic holder aids in glare reduction.

/GS

Standard glare shield introduced in 2010, which provides an excellent balance between glare control and light output. This accessory works well in most applications.

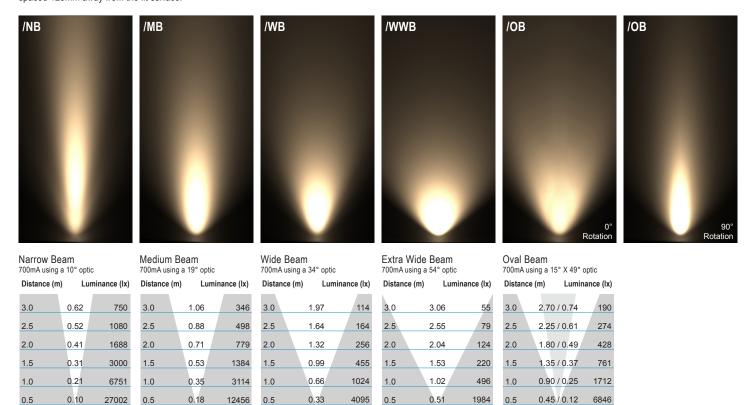

/GSHM

Half-moon glare shield for applications that require very low glare. Lumen output typically reduced by 60%.

Please refer to our photometric files for lumen data. These are available to download from the website.

Cone Diagrams

Cone diagrams below are based on a 3000K E1 LED engine run at maximum output 700mA, 10W. Images below represents beam outputs when wall washing a 3m wall, spaced 125mm away from the lit surface.

Cone Width (m)

Photometric files (LDT) are included in the design pack which can be downloaded from the LD151 product page on the website.

Installation Guide

Below is a luminaire positioning guide for white LEDs. Every project and lighting scenario will be different; the table below is to be used as a starting point for any wall wash design. Please use our photometric files to further test the desired effect for your application. Files are available on our LD151 product page on our website.

LD15	1-E1	/NB	/MB	/WB	/WWB	/OB
A	Distance from the centre of the fitting to the lit surface	125mm				
B	Spacing for an even wash	250mm*	350mm	400mm	500mm	500mm
C	500mA Lit distance	6m	4.5m	2m	2m	4m
C	700mA Lit distance	9m	5.5m	4m	3m	5m

*Wall washing using narrow beam optics should only be used if the designer requires long distance lighting up the lit surface.

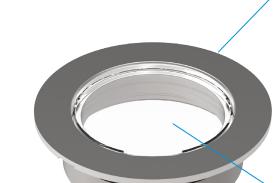

Data sheet - Page 5

Product Features

BEZEL

High quality machined bezel available in 316 stainless steel, polished, solid & flamed bronze, paint finish white (RAL 9016) / black / RAL. Other paint finishes available, please talk to sales.

GLASS

6mm thick low iron glass, suitable for walkover applications.

GLARE SHIELD

Optional glare shield to reduce glare. With choices between our standard glare shield or a half moon glare shield design.

OPTIC HOLDER

Matt black anodised for reduced glare.

BODY

Machined and anodised body. 6000 series aluminium chosen for its thermal characteristics and resistance to corrosion.

LED

LED Options and Technology

New LED Options

LD151 is now available with a choice of light engines which feature a new all copper board for increased thermal transfer. The new E1 light engine for white light applications uses the new Cree XHP35 LED and features on board polarity protection. This smaller LED chip has enabled a wider range of beam angles to be offered, coupled with increased efficiencies. This engine is also available with two extra LEDs on a second channel, for night lighting and marine navigation applications. The new tunable white engine offers a choice of dynamic colour options.

	E1 Light Engine (White light)	E1-2CH 2nd channel board	CLR - Colour	TW - Tunable White	RGBW
LED Board					
LED type	Cree XHP35	Cree XHP35 + XQE's	Cree XQE's	Cree XQE's	Cree XML
Key Features	- Available in 2700K, 3000K, 4000K and 5000K - Very small chip size - Tighter narrow beams - Wider range of beam angles - 2 step binning - Brighter more efficient LED - On board polarity protection - All copper LED board for increased thermal transfer	- Main white LED with optional 2nd channel for night lighting or marine navigation applications - 2nd channel comprises of 2 XQE LEDs mounted next to the XHP35 - Beam shape from the XQE's is different from the main LED as they are mounted to the sides of the optic - 2 driver circuits required - All copper LED board	- 4 colour XQE LEDs mounted under a single optic - All copper LED board - Red, Blue, Green and Amber colour LED options - Single LED circuit	- 4 XQE LEDs mounted under a single optic - 2 LEDs per colour - Excellent dynamic white mixing from a range of optics - All copper LED board - 2 driver circuits required	- RGBW LEDs mounted under a single 26deg optic for superb colour mixing - White LED is 4000K - All copper LED board - 4 LED circuits required
