

Underwater LED Light

Data sheet - Page 1

The LD242A has been designed specifically for underwater applications. It is manufactured from 316 stainless steel and anodised aluminium, the LED is potted and the glass is mechanically sealed. The bezel is polished and passivated for extra protection against chlorine or salt water.

Key Features

- Integral anti-wicking barrier increases protection against moisture ingress due to incorrect IP rated cable connections
- First fix sleeve and 'O' rings to seal fitting into mounting surface
- Bezel is polished and passivated for pool and sea environments
- Available with 0-10V, DMX, Dali or Mains dimmable drivers
- Please specify with long cables to enable connections to be made in a dry location

Use with 350mA, 500mA and 700mA consta	ant current LED drivers
We have a wide range of dimmable LED drivers, 0-1 Please see the downloads section on our website:	0V, DMX, DALI and Mains dimmable.

Prease see the downloads section on our website: To run 1-14 LD242A-350 in series use a TXDEL350D (0-10V dimmable) To run 1-14 LD242A-500 in series use a TXDEL500D (0-10V dimmable) To run 1-13 LD242A-700 in series use a TXDEL700D (0-10V dimmable)
