Design: Sian Baxter Lighting Design Project: Private Residence Product: LD42A

LD42 is a miniature recessed LED wall light, ideal for discreet lighting of steps and pathways. It is a high quality fitting that can be used for interior or exterior applications, including yachts. Low glare is achieved by a recessed lens assembly set back into a black anodised body. Optional half moon glare shield and 20° tilt film further reduce glare.

## Key Features

- Very minimal depth and bezel diameter
- High power for its size
- High efficiency optics specially designed for LightGraphix guarantee excellent beam spread and shape
- Recessed LED position for reduced glare
- Glass fixed with hidden gasket, so no unsightly glue line
- Optional glare shield (LD42W) and 20° tilt film (LD42A) options available
- Hidden fixing options include spring clips or O-rings and the /480 first fix sleeve
- For a 2.4W version please see our LD45 or LD46
- Not designed for permanent submersion, please use our LD242A, LD41, and LD60
- Available with Switch, 0-10V, DMX, Dali or Mains dimmable drivers

## Body and light output options

### LD42

Circular aperture with lens and LED assembly recessed into the body by 10mm.

### LD42W

Body has a machined half moon in front of the lens to reduce glare. Please note that the oval lens can not be used in this or the LD42A.

### LD42A

Same as the LD42W but with an integral 25° refractor film which angles the light down onto the surface to be lit.

## Photometrics

Photometric files are included in the design packs which can be downloaded from the LD42 and LD42A/LD42W product pages on the website.
