

YACHT LIGHTING

FL197 and LD197 Overhead and Showerlight

Available with a 12V 20W G4 Halogen capsule lamp (FL197) or a 7W LED (LD197), it is rated IP67 for downlighting side decks and power-showers where greater protection is required. The bezel can either be stainless steel or aluminium. The fitting has a full gasket plus 'O' ring seal between body and bezel and an IP68 cable entry gland it can be set in flush or with the bezel proud of the surface. Supplied with a clear glass as standard. A frosted glass can be specified if a softer lighting effect is required, which works well with the higher output of the MR11 lamp.

F **III** IP67
