

LF20D

EXTERIOR/INTERIOR LINEAR FLEXIBLE

CB

**Colour-Matched. Precision-Cut. Quality-Assured.
Built to Blend. Install-Ready.**

Trusted by designers for precision, consistency, and total system integration. Our updated and extended Linear range brings that same expertise to flexible and rigid luminaires, giving you the freedom to create clean, continuous lines of light, perfectly matched in colour, quality, and performance across every application.

The LF20D provides versatile dual-bend performance with both top and side flexibility, offering the same colour-matched precision that defines the LightGraphix range. Built for demanding architectural environments, it delivers exceptional uniformity, reliability, and visual control.

Engineered, cut, and tested in-house, it provides up to 5m of continuous light, precision-cut to 1mm accuracy and sealed to IP67 for robust performance in interior, exterior, or marine environments.

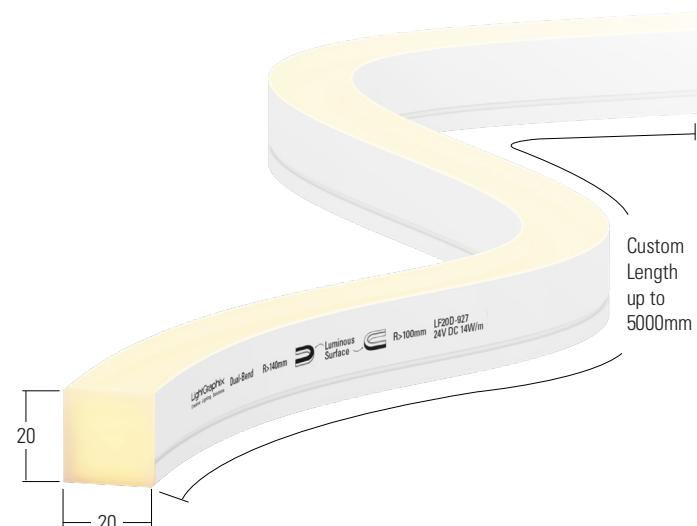

KEY FEATURES

- > Colour-matched to the full LightGraphix range for uniform illumination across all luminaire types
- > Dual bend flexibility (top 100mm / side 140mm radius)
- > Colour-matched LEDs within 2-step MacAdam ellipse
- > Flame, Salt, Solvent & UV resistant
- > Continuous lengths up to 5m; 1mm cut accuracy
- > RGBW and Static White options
- > Matching rigid profile: LR20
- > Range of mounting profiles and cable exit options
- > Dimming: 0–10 V, DALI, Casambi, DMX, Mains
- > Cut, finished, and tested in the UK

THE LINEAR RANGE THAT YOU WOULD EXPECT FROM LIGHTGRAPHIX

Trusted by designers for precision, consistency, and total system integration. Our updated and extended Linear range brings that same expertise to flexible and rigid luminaires, giving you the freedom to create clean, continuous lines of light, perfectly matched in colour, quality, and performance across every application.

Colour-Matched

Developed using LightGraphix-engineered LED tape, tightly binned within a two-step MacAdam ellipse. Every luminaire is visually and chromatically matched across our full range from downlights and uplights to spotlights and linear delivering consistent light quality and tone throughout the project.

Precision-Cut

Every fitting is made to measure in our UK operations - cut, connected, moulded, and IP-tested in-house. With 1 mm cutting accuracy and continuous lengths up to 5m, each product delivers technical precision and a flawless finish, ensuring your specification is realised exactly as intended.

Quality-Assured

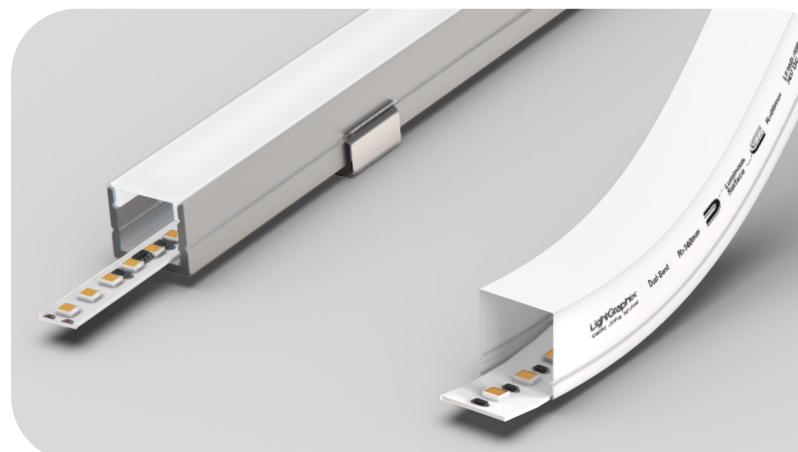

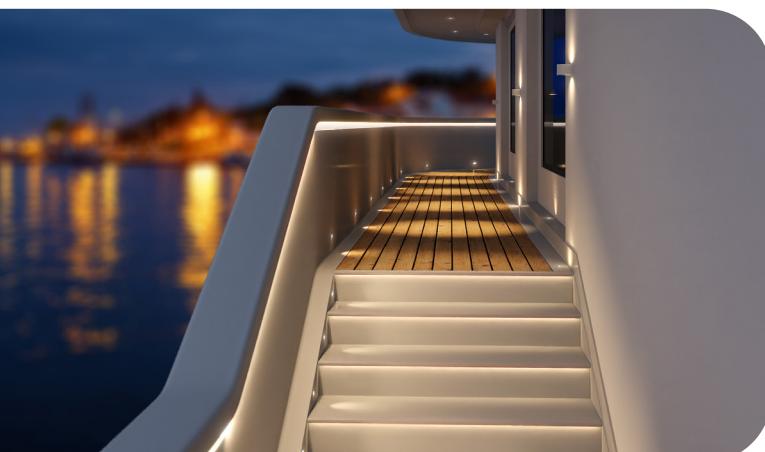

Engineered for demanding environments, every LightGraphix Linear fitting undergoes 100% testing. Constructed from high-grade materials, including marine-quality silicon, the range is IP67-rated and resistant to flame, UV, saltwater, and solvents. Built for longevity, reliability, and performance - indoors, outdoors, or at sea.

Built to Blend

Designed to give you ultimate flexibility for your lighting design, each Linear product integrates seamlessly with our wider portfolio. Rigid and flexible options share the same light engines, allowing continuous lines of light that sit discreetly within the architecture and maintain design integrity.

Install-Ready

Manufactured, assembled, and tested through our UK operations for dependable performance and rapid turnaround. Custom lengths, pre-moulded connections, and a 5-year warranty reduce on-site work, minimise risk, and ensure every luminaire arrives ready to install.

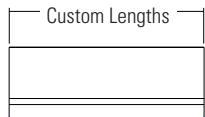

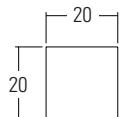

DIMENSIONS AND FIXING ACCESSORIES

Dimensions in mm

LF20

20 x 20mm square profile, available in specifiable lengths at 1mm increments from 300mm to 5000mm. Low profile moulded cable entry & ends.

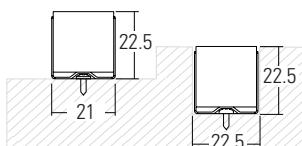

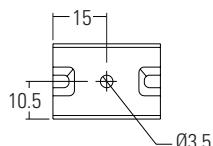

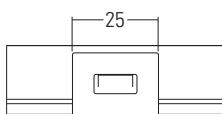

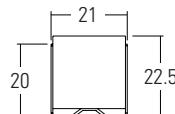

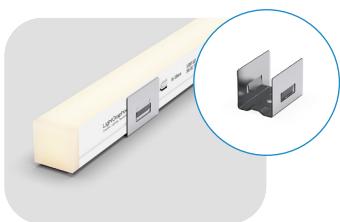

FIXINGS

Dimensions in mm

/SCLF20 Spring Clip

Stainless steel Finish. Surface mount sprung stainless steel spring clips, fixed by one screw to the mounting surface. For recessed installation applications an 18mm wide slot is recommended to installing the clips in to. Fixings every 200mm are recommended for typical installation.
(Supplied in bags of 20)

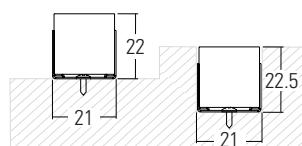

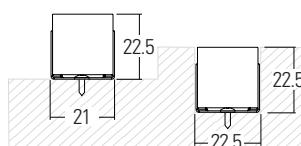

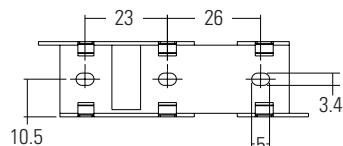

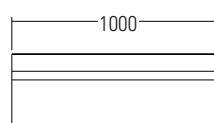

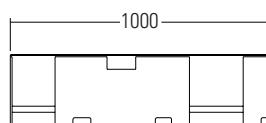

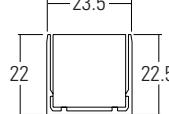

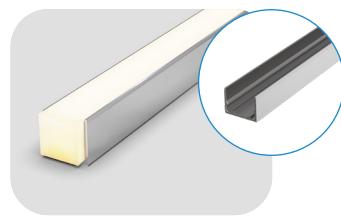

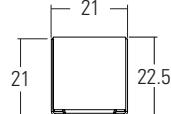

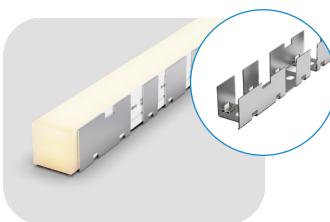

PROFILES

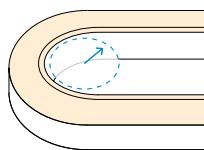

Dimensions in mm

/BCLF20 Bendable Channel

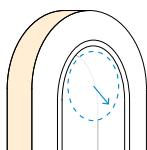

Stainless steel finish. The Bendable Channel allows precise control over the position of the LF product in 3 dimensions. For recessed applications, allow an 22.5mm slot for inserting the Bendable Channel into. **(Supplied in 1m lengths)**
